

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN SIXTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 1. Week ending SATURDAY, JANUARY 8, 1921. Price 2d. net.

With this report two changes are made, the first being the giving effect to the extension of Edinburgh with the consequent absorption of Leith and the extension of Motherwell with its amalgamation with Wishaw, and the second being a change in column 21 of the Table, all respiratory diseases being there included in place of pneumonia, bronchitis and pleurisy, as formerly.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 8th January 1921 the births of 1411 living children, the deaths of 882 persons, and 1882 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 865. The equivalent annual birth-rate is 30·1 per thousand, and the death-rate 18·4.

The birth-rate for the week is 5·0 above that of the previous week, and 5·2 more than the mean of those of the three preceding weeks, but is 6·3 less than that of the corresponding week of last year. The death-rate of the week is the same as that of the previous week, but is 1·5 more than the mean of those of the three preceding weeks, and 1·8 more than that of the corresponding week of last year.

In the individual towns the weekly death-rate ranged from 29·0 in Falkirk, 24·1 in Ayr, and 23·5 in Coatbridge, to 9·6 in Hamilton, 11·8 in Clydebank, and 12·7 in Kilmarnock. In Dundee this rate was 21·9; in Aberdeen, 21·8; in Kirkcaldy, 20·8; in Greenock, 20·6; in Perth, 20·3; in Glasgow, 18·1; in Paisley, 17·8; in Edinburgh, 16·9; and in Motherwell and Wishaw, 13·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 39. These deaths are of the same number as in the previous week, and equal an annual death-rate from these causes of 0·8 per thousand. These deaths include 3 from measles, 6 from scarlet fever, 15 from whooping-cough, 5 from diphtheria, and 10 from the diarrhoeas of childhood. Deaths from scarlet fever numbered 4 more than in the previous week, but those from measles, whooping-cough, and the diarrhoeas of childhood are of the same number, while those from diphtheria are 3 fewer. In the previous week there was 1 death from enteric fever, and this week there were none.

Two deaths from small-pox and 1 from typhus fever were registered in these towns during the week.

Deaths from respiratory diseases numbered 196. In the previous week deaths from pneumonia, bronchitis, and pleurisy numbered 212.

Deaths of children of less than one year old numbered 155, and those of persons of sixty-five years and upwards 251, the former being 22 and the latter 12 fewer than in the previous week.

Deaths attributed to violent causes numbered 37, which is 2 more than in the previous week, and 9 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 42°·3, being 1°·1 below that for the previous week, but 5°·6 above that for the corresponding week of last year. The mean rainfall was 1·19 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 2. Week ending SATURDAY, JANUARY 15, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 15th January 1921 the births of 1157 living children, the deaths of 777 persons, and 343 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 747. The equivalent annual birth-rate is 24·7 per thousand, and the death-rate, corrected, 15·9.

The birth-rate for the week is 5·4 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 7·0 below that for the corresponding week of last year. The death-rate for the week is 2·5 below that for the previous week, 1·8 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·3 in Greenock, 21·1 in Ayr, and 20·8 in Kirkcaldy, to 7·2 in Perth, 7·5 in Clydebank, and 10·5 in Motherwell and Wishaw. In Dundee it was 18·8; in Kilmarnock, 18·3; in Falkirk, 18·3; in Coatbridge, 18·1; in Hamilton, 16·4; in Paisley, 16·0; in Aberdeen, 15·8; in Glasgow, 15·6; and in Edinburgh, 15·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 37. They are 2 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 0 from enteric fever, 4 from measles, 2 from scarlet fever, 6 from whooping-cough, 9 from diphtheria, and 16 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 6 more, from diphtheria 4 more, and from measles 1 more, while those from scarlet fever are 4 fewer, and from whooping-cough 9 fewer.

One death from small-pox was registered during the week.

Deaths from respiratory diseases numbered 160. They are 36 fewer than in the previous week.

Deaths of children of less than one year old numbered 147, and those of persons of sixty-five and upwards 210. The former are 8 fewer than in the previous week, but 32 more than in the corresponding week of last year. The latter are 41 fewer than in the previous week, and 16 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are 13 fewer than in the previous week, and 5 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 38°·0, being 4°·3 below that for the previous week, and 3°·7 below that for the corresponding week of last year. The mean rainfall was 0·95 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 3. Week ending SATURDAY, JANUARY 22, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 22nd January 1921 the births of 1085 living children, the deaths of 756 persons, and 330 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 741. The equivalent annual birth-rate is 23·1 per thousand, and the death-rate, corrected, 15·8.

The birth-rate for the week is 1·6 below that for the previous week, 3·5 below the mean of the rates for the three preceding weeks, and 9·2 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, 1·8 below the mean of the rates for the three preceding weeks, but 0·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 24·8 in Motherwell and Wishaw, 17·5 in Edinburgh, and 17·4 in Perth, to 5·5 in Hamilton, 9·7 in Clydebank, and 9·9 in Kilmarnock. In Falkirk it was 16·8; in Ayr, 16·6; in Greenock, 16·0; in Glasgow, 15·6; in Kirkcaldy, 15·6; in Dundee, 15·5; in Aberdeen, 15·5; in Coatbridge, 15·3; and in Paisley, 13·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 42. They are 5 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 1 from enteric fever, 5 from measles, 5 from scarlet fever, 13 from whooping-cough, 7 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns of the previous week, deaths from whooping-cough are 7 more, from scarlet fever 3 more, from enteric fever 1 more, and from measles 1 more, while those from diphtheria are 2 fewer, and from the diarrhoeas of childhood 5 fewer.

Two deaths from small-pox were registered during the week.

Deaths from respiratory diseases numbered 147. They are 13 fewer than in the previous week.

Deaths of children of less than one year old numbered 141, and of persons of sixty-five and upwards 226. The former are 6 fewer than in the previous week, but 1 more than in the corresponding week of last year. The latter are 16 more than in the previous week, and 12 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are the same as in the previous week, but 6 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 43°·6, being 5°·6 above that for the previous week, and 3°·2 above that for the corresponding week of last year. The mean rainfall was 1·25 inch.

W E E K L Y R E T U R N
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 4. Week ending SATURDAY, JANUARY 29, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 29th January 1921 the births of 1135 living children, the deaths of 804 persons, and 340 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 764. The equivalent annual birth-rate is 24·2 per thousand, and the death-rate, corrected, 16·3.

The birth-rate for the week is 1·1 above that for the previous week, 1·8 below the mean of the rates for the three preceding weeks, and 7·2 below that for the corresponding week of last year. The death-rate for the week is 0·5 above that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 0·4 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·1 in Kilmarnock, 20·6 in Greenock, and 19·9 in Dundee, to 8·7 in Perth, 13·0 in Kirkcaldy, 13·6 in Paisley, and 13·6 in Ayr. In Edinburgh it was 18·7; in Motherwell and Wishaw, 15·8; in Glasgow, 15·3; in Coatbridge, 15·3; in Aberdeen, 15·2; in Falkirk, 15·2; in Hamilton, 15·0; and in Clydebank, 14·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 57. They are 15 more than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 0 from enteric fever, 5 from measles, 3 from scarlet fever, 19 from whooping-cough, 10 from diphtheria, and 20 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 9 more, from whooping-cough 6 more, and from diphtheria 3 more, while those from measles number the same, and those from enteric fever are 1 fewer, and from scarlet fever 2 fewer.

Two deaths from small-pox were registered during the week.

Deaths from respiratory diseases numbered 135. They are 12 fewer than in the previous week.

Deaths of children of less than one year old numbered 163, and those of persons of sixty-five and upwards 216. The former are 22 more than in the previous week, and 10 more than in the corresponding week of last year. The latter are 10 fewer than in the previous week, but 11 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 27. They are 3 more than in the previous week, and 1 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 42°·3, being 1°·3 below that for the previous week, but 3°·4 above that for the corresponding week of last year. The mean rainfall was 1·86 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 5. Week ending SATURDAY, FEBRUARY 5, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 5th February 1921 the births of 1169 living children, the deaths of 738 persons, and 457 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 700. The equivalent annual birth-rate is 24·9 per thousand, and the death-rate, corrected, 14·9.

The birth-rate for the week is 0·7 above that for the previous week, 0·9 above the mean of the rates for the three preceding weeks, but 8·5 below that for the corresponding week of last year. The death-rate for the week is 1·4 below that for the previous week, 1·1 below the mean of the rates for the three preceding weeks, but 0·2 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·3 in Perth, 18·1 in Ayr, and 17·3 in Edinburgh, to 9·0 in Motherwell and Wishaw, 11·8 in Paisley, and 11·8 in Clydebank. In Greenock it was 16·0; in Kilmarnock, 15·5; in Aberdeen, 15·2; in Falkirk, 15·2; in Hamilton, 15·0; in Glasgow, 14·5; in Kirkcaldy, 14·3; in Coatbridge, 14·1; and in Dundee, 13·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 51. They are 6 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 1 from enteric fever, 2 from measles, 3 from scarlet fever, 23 from whooping-cough, 8 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, and from enteric fever 1 more, while from scarlet fever they number the same, from diphtheria 2 fewer, from measles 3 fewer, and from the diarrhoeas of childhood 6 fewer.

There were no deaths from small-pox registered during the week.

Deaths from respiratory diseases numbered 146. They are 11 more than in the previous week.

Deaths of children of less than one year old numbered 137, and those of persons of sixty-five and upwards 208. The former are 26 fewer than in the previous week, and 15 fewer than in the corresponding week of last year. The latter are 8 fewer than in the previous week, but 19 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 4 fewer than in the previous week, and 11 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 38°·8, being 3°·5 below that for the previous week, and 3°·9 below that for the corresponding week of last year. The mean rainfall was 0·27 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 6. Week ending SATURDAY, FEBRUARY 12, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 12th February 1921 the births of 1201 living children, the deaths of 840 persons, and 403 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 818. The equivalent annual birth-rate is 25·6 per thousand, and the death-rate, corrected, 17·4.

The birth-rate for the week is 0·7 above that for the previous week, 1·5 above the mean of the rates for the three preceding weeks, but 6·5 below that for the corresponding week of last year. The death-rate for the week is 2·5 above that for the previous week, 1·7 above the mean of the rates of the three preceding weeks, and 2·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 23·4 in Kirkcaldy, 18·5 in Dundee, and 18·3 in Kilmarnock, to 10·1 in Perth, 12·0 in Ayr, and 14·8 in Paisley. In Glasgow it was 18·0; in Edinburgh, 17·5; in Greenock, 17·3; in Motherwell and Wishaw, 17·3; in Clydebank, 17·2; in Falkirk, 16·8; in Hamilton, 16·4; in Aberdeen, 15·8; and in Coatbridge, 15·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 79. They are 28 more than in the previous week, and are equal to an annual death-rate from these causes of 1·7 per thousand. These deaths include 3 from enteric fever, 3 from measles, 4 from scarlet fever, 46 from whooping-cough, 10 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 23 more, from enteric fever 2 more, from diphtheria 2 more, from measles 1 more, and from scarlet fever 1 more, while from the diarrhoeas of childhood they are 1 fewer.

Four deaths from small-pox were registered during the week.

Deaths from respiratory diseases numbered 195. They are 49 more than in the previous week.

Deaths of children of less than one year old numbered 178, and those of persons of sixty-five and upwards 241. The former are 41 more than in the previous week, and 28 more than in the corresponding week of last year. The latter are 33 more than in the previous week, and 58 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 28. They are 5 more than in the previous week, and 1 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 38°·2, being 0°·6 below that for the previous week, and 3°·4 below that for the corresponding week of last year. The mean rainfall was 0·07 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 7. Week ending SATURDAY, FEBRUARY 19, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 19th February 1921 the births of 1267 living children, the deaths of 888 persons, and 341 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 853. The equivalent annual birth-rate is 27·0 per thousand, and the death-rate, corrected, 18·2.

The birth-rate for the week is 1·4 above that for the previous week, 2·1 above the mean of the rates for the three preceding weeks, but 5·9 below that for the corresponding week of last year. The death-rate for the week is 0·8 above that for the previous week, 2·0 above the mean of the rates of the three preceding weeks, and 4·0 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 33·5 in Falkirk, 27·4 in Hamilton, and 24·6 in Coatbridge, to 11·8 in Clydebank, 12·7 in Kilmarnock, and 13·9 in Aberdeen. In Dundee it was 22·2; in Glasgow, 18·7; in Greenock, 18·6; in Ayr, 18·1; in Edinburgh, 16·7; in Paisley, 16·0; in Motherwell and Wishaw, 15·8; in Kirkcaldy, 15·6; and in Perth, 14·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 83. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 1·8 per thousand. These deaths include 0 from enteric fever, 7 from measles, 6 from scarlet fever, 40 from whooping-cough, 15 from diphtheria, and 15 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 5 more, from measles 4 more, from scarlet fever 2 more, and from the diarrhoeas of childhood 2 more, but those from whooping-cough are 6 fewer.

One death from small-pox was registered during the week.

Deaths from respiratory diseases numbered 196. They are 1 more than in the previous week.

Deaths of children of less than one year old numbered 189, and those of persons of sixty-five and upwards 243. The former are 11 more than in the previous week, and 44 more than in the corresponding week of last year. The latter are 2 more than in the previous week, and 57 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 5 fewer than in the previous week, but number the same as in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 44°·4, being 6°·2 above that for the previous week, and 3°·5 above that for the corresponding week of last year. The mean rainfall was 0·13 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 8. Week ending SATURDAY, FEBRUARY 26, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 26th February 1921 the births of 1238 living children, the deaths of 932 persons, and 349 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 909. The equivalent annual birth-rate is 26·4 per thousand, and the death-rate, corrected, 19·4.

The birth-rate for the week is 0·6 below that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, and 6·2 below that for the corresponding week of last year. The death-rate for the week is 1·2 above that for the previous week, 2·6 above the mean of the rates of the three preceding weeks, and 3·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·0 in Glasgow, 20·5 in Hamilton, and 20·1 in Edinburgh, to 9·7 in Clydebank, 14·5 in Perth, and 15·3 in Coatbridge. In Ayr it was 19·6, in Kilmarnock 18·3, in Kirkcaldy 18·2, in Greenock 18·0, in Dundee 17·7, in Aberdeen 17·4, in Motherwell and Wishaw 17·3, in Falkirk 16·8, and in Paisley 16·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 71. They are 12 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 0 from enteric fever, 4 from measles, 4 from scarlet fever, 43 from whooping-cough, 10 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 3 more, but from scarlet fever they are 2 fewer, from measles 3 fewer, from diphtheria 5 fewer, and from the diarrhoeas of childhood 5 fewer.

No deaths from small-pox were registered during the week.

Deaths from influenza numbered 34, which was 11 more than in the previous week.

Deaths from respiratory diseases numbered 232. They are 36 more than in the previous week.

Deaths of children of less than one year old numbered 166, and those of persons of sixty-five and upwards 281. The former are 23 fewer than in the previous week, but 6 more than in the corresponding week of last year. The latter are 38 more than in the previous week, and 98 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 25. They are 2 more than in the previous week, but 7 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 41°·0, being 3°·4 below that for the previous week, and 1°·2 below that for the corresponding week of last year. The mean rainfall was 0·43 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 9. Week ending SATURDAY, MARCH 5, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 5th March 1921 the births of 1228 living children, the deaths of 855 persons, and 447 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 846. The equivalent annual birth-rate is 26·2 per thousand, and the death-rate, corrected, 18·0.

The birth-rate for the week is 0·2 below that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 7·6 below that for the corresponding week of last year. The death-rate for the week is 1·4 below that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, but 2·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·6 in Ayr, 19·6 in Glasgow, and 18·8 in Coatbridge, to 10·9 in Hamilton, 11·6 in Perth, and 11·7 in Kirkcaldy. In Dundee it was 18·3; in Edinburgh, 17·8; in Motherwell and Wishaw, 17·3; in Falkirk, 16·8; in Greenock, 16·6; in Aberdeen, 16·1; in Paisley, 16·0; in Kilmarnock, 15·5; and in Clydebank, 12·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 83. They are 12 more than in the previous week, and are equal to an annual death-rate from these causes of 1·8 per thousand. These deaths include 1 from enteric fever, 7 from measles, 5 from scarlet fever, 46 from whooping-cough, 11 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles, whooping-cough and the diarrhoeas of childhood are each 3 more, and from enteric fever, scarlet fever and diphtheria each 1 more.

No deaths from small-pox were registered during the week.

Deaths from influenza numbered 42. They are 8 more than in the previous week.

Deaths from respiratory diseases numbered 196. They are 36 fewer than in the previous week.

Deaths of children of less than one year old numbered 147, and those of persons of sixty-five and upwards 252. The former are 19 fewer than in the previous week, and 16 fewer than in the corresponding week of last year. The latter are 29 fewer than in the previous week, but 63 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 20. They are 5 fewer than in the previous week, and 2 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 41°·9, being 0°·9 above that for the previous week, but 4°·3 below that for the corresponding week of last year. The mean rainfall was 1·52 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 10. Week ending SATURDAY, MARCH 12, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 12th March 1921 the births of 1189 living children, the deaths of 888 persons, and 337 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 866. The equivalent annual birth-rate is 25·3 per thousand, and the death-rate, corrected, 18·5.

The birth-rate for the week is 0·9 below that for the previous week, 1·2 below the mean of the rates for the three preceding weeks, and 6·3 below that for the corresponding week of last year. The death-rate for the week is 0·5 above that for the previous week, the same as the mean of the rates for the three preceding weeks, and 2·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 25·8 in Coatbridge, 24·1 in Ayr, and 20·3 in Motherwell and Wishaw, to 11·3 in Kilmarnock, 13·7 in Hamilton, and 15·2 in Aberdeen. In Falkirk it was 19·8; in Glasgow, 19·3; in Perth, 18·8; in Edinburgh, 18·7; in Dundee, 17·7; in Kirkcaldy, 16·9; in Greenock, 16·6; in Clydebank, 16·1; and in Paisley, 15·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 87. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 1·9 per thousand. These deaths include 2 from enteric fever, 8 from measles, 3 from scarlet fever, 54 from whooping-cough, 9 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 8 more, from enteric fever 1 more, and from measles 1 more, but those from scarlet fever are 2 fewer, from diphtheria 2 fewer, and from the diarrhoeas of childhood 2 fewer.

No deaths from small-pox were registered during the week.

Deaths from influenza numbered 33. They are 9 fewer than in the previous week.

Deaths from respiratory diseases numbered 180. They are 16 fewer than in the previous week.

Deaths of children of less than one year old numbered 142, and those of persons of sixty-five and upwards 280. The former are 5 fewer than in the previous week, and 11 fewer than in the corresponding week of last year. The latter are 28 more than in the previous week, and 100 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 3 more than in the previous week, but 4 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 40°·0, being 1°·9 below that for the previous week, but 2°·0 above that for the corresponding week of last year. The mean rainfall was 0·75 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 11. Week ending SATURDAY, MARCH 19, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 19th March 1921 the births of 1219 living children, the deaths of 867 persons, and 317 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 837. The equivalent annual birth-rate is 26·0 per thousand, and the death-rate, corrected, 17·8.

The birth-rate for the week is 0·7 above that for the previous week, the same as the mean of the rates for the three preceding weeks, and 6·0 below that for the corresponding week of last year. The death-rate for the week is 0·7 below that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, and the same as that for the corresponding week of last year.

In the individual towns the death-rate ranged from 26·1 in Perth, 23·5 in Coatbridge, and 20·1 in Paisley, to 10·7 in Clydebank, 11·7 in Kirkcaldy, and 12·0 in Ayr. In Motherwell and Wishaw it was 19·6, in Hamilton 19·2, in Glasgow 18·9, in Edinburgh 18·5, in Greenock 18·0, in Kilmarnock 15·5, in Aberdeen 15·2, in Falkirk 15·2, and in Dundee 12·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 90. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 1·9 per thousand. These deaths include 0 from enteric fever, 8 from measles, 5 from scarlet fever, 56 from whooping-cough, 8 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 2 more, from whooping-cough 2 more, and from the diarrhoeas of childhood 2 more, while from measles they number the same, from diphtheria 1 fewer, and from enteric fever 2 fewer.

No deaths from small-pox were registered during the week.

Deaths from influenza numbered 38. They are 5 more than in the previous week.

Deaths from respiratory diseases numbered 158. They are 22 fewer than in the previous week.

Deaths of children of less than one year old numbered 161, and those of persons of sixty-five and upwards 251. The former are 19 more than in the previous week, but 2 fewer than in the corresponding week of last year. The latter are 29 fewer than in the previous week, but 45 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 21. They are 2 fewer than in the previous week, and 14 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 43°·6, being 3°·6 above that for the previous week, and 0°·7 above that for the corresponding week of last year. The mean rainfall was 1·75 inch.

No. 12. Week ending SATURDAY, MARCH 26, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 26th March 1921 the births of 1114 living children, the deaths of 754 persons, and 342 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 719. The equivalent annual birth-rate is 23·7 per thousand, and the death-rate, corrected, 15·3.

The birth-rate for the week is 2·3 below that for the previous week, 2·1 below the mean of the rates for the three preceding weeks, and 7·7 below that for the corresponding week of last year. The death-rate for the week is 2·5 below that for the previous week, 2·8 below the mean of the rates for the three preceding weeks, and 2·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·1 in Ayr, 17·1 in Dundee, and 16·8 in Glasgow, to 5·9 in Coatbridge, 8·6 in Clydebank, and 9·1 in Falkirk. In Perth it was 15·9, in Kirkcaldy 15·6, in Aberdeen 15·5, in Greenock 15·3, in Motherwell and Wishaw 14·3, in Paisley 14·2, in Kilmarnock 14·1, in Hamilton 13·7, and in Edinburgh 13·4.

Deaths from the principal epidemic diseases; those named in columns 13 to 18 of the Table, numbered 56. They are 34 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 0 from enteric fever, 5 from measles, 2 from scarlet fever, 34 from whooping-cough, 8 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 3 fewer, from scarlet fever 3 fewer, from the diarrhoeas of childhood 6 fewer, and from whooping-cough 22 fewer.

Deaths from influenza numbered 36. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 111. They are 47 fewer than in the previous week.

Deaths of children of less than one year old numbered 134, and those of persons of sixty-five and upwards 200. The former are 27 fewer than in the previous week, and 48 fewer than in the corresponding week of last year. The latter are 51 fewer than in the previous week, but 32 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 31. They are 10 more than in the previous week, but 4 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 45°·7, being 2°·1 above that for the previous week, and 1°·3 above that for the corresponding week of last year. The mean rainfall was 0·41 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 13. Week ending SATURDAY, APRIL 2, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 2nd April 1921 the births of 1310 living children, the deaths of 745 persons, and 719 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 727. The equivalent annual birth-rate is 27·9 per thousand, and the death-rate, corrected, 15·5.

The birth-rate for the week is 4·2 above that for the previous week, 2·9 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, 1·7 below the mean of the rates for the three preceding weeks, and the same amount below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·1 in Kirkcaldy, 19·8 in Falkirk, and 18·8 in Perth, to 7·0 in Coatbridge, 8·6 in Clydebank, and 9·0 in Ayr. In Aberdeen it was 17·0, in Glasgow 16·7, in Edinburgh 15·4, in Paisley 14·8, in Kilmarnock 14·1, in Greenock 14·0, in Dundee 13·5, in Motherwell and Wishaw 10·5, and in Hamilton 9·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 71. They are 15 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 1 from enteric fever, 6 from measles, 4 from scarlet fever, 42 from whooping-cough, 7 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 8 more, from the diarrhoeas of childhood 4 more, from scarlet fever 2 more, from enteric fever 1 more, and from measles 1 more, but those from diphtheria are 1 fewer.

Deaths from influenza numbered 18. They are 18 fewer than in the previous week.

Deaths from respiratory diseases numbered 119. They are 8 more than in the previous week.

Deaths of children of less than one year old numbered 142, and those of persons of sixty-five and upwards 191. The former are 8 more than in the previous week, but 21 fewer than in the corresponding week of last year. The latter are 9 fewer than in the previous week, but 4 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 8 fewer than in the previous week, and 9 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 45°·4, being 0°·3 below that for the previous week, but 2°·2 above that for the corresponding week of last year. The mean rainfall was 0·49 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 14. Week ending SATURDAY, APRIL 9, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 9th April 1921 the births of 1268 living children, the deaths of 729 persons, and 474 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 710. The equivalent annual birth-rate is 27·0 per thousand, and the death-rate, corrected, 15·1.

The birth-rate for the week is 0·9 below that for the previous week, 1·1 above the mean of the rates for the three preceding weeks, but 6·6 below that for the corresponding week of last year. The death-rate for the week is 0·4 below that for the previous week, 1·1 below the mean of the rates for the three preceding weeks, and 2·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·6 in Greenock, 16·3 in Glasgow, and 16·0 in Paisley, to 5·5 in Hamilton, 8·6 in Clydebank, and 9·4 in Coatbridge. In Perth it was 15·9, in Aberdeen 15·8, in Motherwell and Wishaw 15·8, in Kilmarnock 15·5, in Dundee 14·9, in Edinburgh 14·3, in Kirkcaldy 14·3, in Ayr 13·6, and in Falkirk 10·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 44. They are 27 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 0 from enteric fever, 2 from measles, 2 from scarlet fever, 31 from whooping-cough, 1 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 1 fewer, from scarlet fever 2 fewer, from the diarrhoeas of childhood 3 fewer, from measles 4 fewer, from diphtheria 6 fewer, and from whooping-cough 11 fewer.

Deaths from influenza numbered 15. They are 3 fewer than in the previous week.

Deaths from respiratory diseases numbered 112. They are 7 fewer than in the previous week.

Deaths of children of less than one year old numbered 122, and those of persons of sixty-five and upwards 208. The former are 20 fewer than in the previous week, and 50 fewer than in the corresponding week of last year. The latter are 17 more than in the previous week, but 9 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 28. They are 5 more than in the previous week, and 4 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 46°·6, being 1°·2 above that for the previous week, and 4°·1 above that for the corresponding week of last year. The mean rainfall was 0·06 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 15. Week ending SATURDAY, APRIL 16, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 16th April 1921 the births of 1271 living children, the deaths of 700 persons, and 456 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 684. The equivalent annual birth-rate is 27·1 per thousand, and the death-rate, corrected, 14·6.

The birth-rate for the week is 0·1 above that for the previous week, 0·9 above the mean of the rates for the three preceding weeks, but 5·2 below that for the corresponding week of last year. The death-rate for the week is 0·5 below that for the previous week, 0·7 below the mean of the rates for the three preceding weeks, and 4·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·6 in Aberdeen, 18·1 in Ayr, and 16·9 in Kilmarnock, to 5·9 in Coatbridge, 6·1 in Falkirk, and 7·5 in Clydebank. In Glasgow it was 15·5, in Greenock 15·3, in Edinburgh 14·4, in Paisley 14·2, in Motherwell and Wishaw 12·8, in Dundee 12·1, in Kirkcaldy 11·7, in Perth 11·6, and in Hamilton, 9·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 85. They are 41 more than in the previous week, and are equal to an annual death-rate from these causes of 1·8 per thousand. These deaths include 0 from enteric fever, 12 from measles, 6 from scarlet fever, 43 from whooping-cough, 7 from diphtheria, and 17 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 12 more, from measles 10 more, from the diarrhoeas of childhood 9 more, from diphtheria 6 more, and from scarlet fever 4 more.

Deaths from influenza numbered 21. They are 6 more than in the previous week.

Deaths from respiratory diseases numbered 90. They are 22 fewer than in the previous week.

Deaths of children of less than one year old numbered 129, and those of persons of sixty-five and upwards 180. The former are 7 more than in the previous week, but 64 fewer than in the corresponding week of last year. The latter are 28 fewer than in the previous week, and 15 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 15. They are 13 fewer than in the previous week, and 4 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 43°·1, being 3°·5 below that for the previous week, and 0°·6 below that for the corresponding week of last year. The mean rainfall was 0·36 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 16. Week ending SATURDAY, APRIL 23, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 23rd April 1921 the births of 1400 living children, the deaths of 718 persons, and 418 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 684. The equivalent annual birth-rate is 29·8 per thousand, and the death-rate, corrected, 14·6.

The birth-rate for the week is 2·7 above that for the previous week, 2·5 above the mean of the rates for the three preceding weeks, but 4·6 below that for the corresponding week of last year. The death-rate for the week is the same as that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, but 4·6 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·3 in Falkirk, 16·6 in Dundee, and 16·1 in Edinburgh, to 6·0 in Ayr, 7·2 in Perth, and 10·1 in Aberdeen. In Glasgow it was 15·5, in Greenock 15·3, in Hamilton 13·7, in Kilmarnock 12·7, in Motherwell and Wishaw 12·0, in Clydebank 11·8, in Coatbridge 11·7, in Kirkcaldy 11·7, and in Paisley 11·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 67. They are 18 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include 0 from enteric fever, 6 from measles, 4 from scarlet fever, 41 from whooping-cough, 5 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 6 fewer, from the diarrhoeas of childhood 6 fewer, from scarlet fever 2 fewer, from whooping-cough 2 fewer, and from diphtheria 2 fewer.

Deaths from influenza numbered 14. They are 7 fewer than in the previous week, and 60 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 90. They are the same as in the previous week.

Deaths of children of less than one year old numbered 118, and those of persons of sixty-five and upwards 178. The former are 11 fewer than in the previous week, and 88 fewer than in the corresponding week of last year. The latter are 2 fewer than in the previous week, and 26 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 32. They are 17 more than in the previous week, and 2 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 43°·3, being 0°·2 above that for the previous week, but 3°·1 below that for the corresponding week of last year. The mean rainfall was 0·62 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 17. Week ending SATURDAY, APRIL 30, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 30th April 1921 the births of 1374 living children, the deaths of 723 persons, and 530 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 704. The equivalent annual birth-rate is 29·3 per thousand, and the death-rate, corrected, 15·0.

The birth-rate for the week is 0·5 below that for the previous week, 1·3 above the mean of the rates for the three preceding weeks, but 3·1 below that for the corresponding week of last year. The death-rate for the week is 0·4 above that for the previous week, 0·2 above the mean of the rates for the three preceding weeks, but 3·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·6 in Ayr, 21·1 in Coatbridge, and 20·0 in Greenock, to 8·5 in Kilmarnock, 9·7 in Clydebank, and 12·2 in Falkirk. In Aberdeen it was 15·8, in Glasgow 15·2, in Dundee 14·6, in Edinburgh 14·4, in Motherwell and Wishaw 14·3, in Paisley 14·2, in Hamilton 13·7, in Perth and in Kirkcaldy 13·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 64. They are 3 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include 1 from enteric fever, 4 from measles, 3 from scarlet fever, 40 from whooping-cough, 8 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 3 more, and from enteric fever 1 more, while from whooping-cough and scarlet fever each 1 fewer, from measles 2 fewer, and from the diarrhoeas of childhood 3 fewer.

Deaths from influenza numbered 7. They are 7 fewer than in the previous week, and 54 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 111. They are 21 more than in the previous week.

Deaths of children of less than one year old numbered 126, and those of persons of sixty-five and upwards 190. The former are 8 more than in the previous week, but 43 fewer than in the corresponding week of last year. The latter are 12 more than in the previous week, but 8 fewer than in the corresponding week of last year.

* Deaths attributed to violent causes numbered 24. They are 8 fewer than in the previous week, but are the same as in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 49°·2, being 5°·9 above that for the previous week, and 4°·9 above that for the corresponding week of last year. The mean rainfall was 0·05 inch.

Note :—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 18. Week ending SATURDAY, MAY 7, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 7th May 1921 the births of 1414 living children, the deaths of 693 persons, and 556 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 690. The equivalent annual birth-rate is 30·1 per thousand, and the death-rate, corrected, 14·7.

The birth-rate for the week is 0·8 above that for the previous week, 1·4 above the mean of the rates for the three preceding weeks, but 0·8 below that for the corresponding week of last year. The death-rate for the week is 0·3 below that for the previous week, the same as the mean of the rates for the three preceding weeks, but 3·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·0 in Greenock, 18·8 in Coatbridge, and 16·3 in Glasgow, to 7·8 in Kirkcaldy, 8·7 in Perth, and 9·1 in Falkirk. In Hamilton it was 15·0, in Edinburgh 14·5, in Dundee 13·8, in Clydebank 12·9, in Aberdeen 12·3, in Kilmarnock 11·3, in Paisley 11·2, in Motherwell and Wishaw 10·5, and in Ayr, 10·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 71. They are 7 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 0 from enteric fever, 6 from measles, 1 from scarlet fever, 43 from whooping-cough, 10 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 3 more, from the diarrhoeas of childhood 3 more, from measles 2 more, and from diphtheria 2 more, while those from scarlet fever are 2 fewer.

Deaths from influenza numbered 6. They are 1 fewer than in the previous week, and 47 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 92. They are 19 fewer than in the previous week.

Deaths of children of less than one year old numbered 131, and those of persons of sixty-five and upwards 200. The former are 5 more than in the previous week, but 55 fewer than in the corresponding week of last year. The latter are 10 more than in the previous week, and 27 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are the same as in the previous week, but 6 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 45°·8, being 3°·4 below that for the previous week, and 1°·8 below that for the corresponding week of last year. The mean rainfall was 0·67 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 19. Week ending SATURDAY, MAY 14, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 14th May 1921 the births of 1395 living children, the deaths of 684 persons, and 190 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 670. The equivalent annual birth-rate is 29·7 per thousand, and the death-rate, corrected, 14·3.

The birth-rate for the week is 0·4 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 0·4 below that for the corresponding week of last year. The death-rate for the week is 0·4 below that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, and 2·6 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·4 in Perth, 16·4 in Hamilton, and 16·1 in Glasgow, to 6·1 in Falkirk, 10·6 in Coatbridge, and 11·3 in Motherwell and Wishaw. In Clydebank it was 15·0, in Greenock 14·6, in Aberdeen 14·2, in Kilmarnock 14·1, in Dundee 13·2, in Paisley 13·0, in Kirkcaldy 13·0, in Ayr 12·0, and in Edinburgh 11·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 55. They are 16 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 0 from enteric fever, 5 from measles, 3 from scarlet fever, 35 from whooping-cough, 6 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 2 more, but those from measles are 1 fewer, from diphtheria 4 fewer, from the diarrhoeas of childhood 5 fewer, and from whooping-cough 8 fewer.

Deaths from influenza numbered 11. They are 5 more than in the previous week, but 39 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 102. They are 10 more than in the previous week.

Deaths of children of less than one year old numbered 112, and those of persons of sixty-five and upwards 201. The former are 19 fewer than in the previous week, and 29 fewer than in the corresponding week of last year. The latter are 1 more than in the previous week, and 21 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are the same as in the previous week, but 5 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 53°·1, being 7°·3 above that for the previous week, and 4°·5 above that for the corresponding week of last year. The mean rainfall was 0·20 inch.

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 20. Week ending SATURDAY, MAY 21, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 21st May 1921 the births of 1355 living children, the deaths of 643 persons, and 188 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 626. The equivalent annual birth-rate is 28·9 per thousand, and the death-rate, corrected, 13·3.

The birth-rate for the week is 0·8 below that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, but 0·1 above that for the corresponding week of last year. The death-rate for the week is 1·0 below that for the previous week, 4·7 below the mean of the rates for the three preceding weeks, and 2·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 23·2 in Perth, 18·3 in Falkirk, and 16·4 in Coatbridge, to 8·5 in Aberdeen, 9·0 in Motherwell and Wishaw, and 9·9 in Kilmarnock. In Clydebank it was 15·0, in Paisley 14·8, in Greenock 14·6, in Kirkcaldy 14·3, in Edinburgh 13·8, in Glasgow 13·6, in Ayr 13·6, in Dundee 12·4, and in Hamilton 12·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 58. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 0 from enteric fever, 6 from measles, 3 from scarlet fever, 28 from whooping-cough, 11 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 5 more, from the diarrhoeas of childhood 4 more, and from measles 1 more, while from scarlet fever they number the same, and from whooping-cough 7 fewer.

Deaths from influenza numbered 5. They are 6 fewer than in the previous week, and 20 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 83. They are 19 fewer than in the previous week.

Deaths of children of less than one year old numbered 118, and those of persons of sixty-five and upwards 171. The former are 6 more than in the previous week, but 52 fewer than in the corresponding week of last year. The latter are 30 fewer than in the previous week, and 3 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 21. They are 3 fewer than in the previous week, and 9 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 51°·5, being 1°·6 below that for the previous week, but 1°·0 above that for the corresponding week of last year. The mean rainfall was 0·16 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 21. **Week ending SATURDAY, MAY 28, 1921.** **Price 2d. net.**

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 28th May 1921 the births of 1257 living children, the deaths of 602 persons, and 185 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 575. The equivalent annual birth-rate is 26·8 per thousand, and the death-rate, corrected, 12·3.

The birth-rate for the week is 2·1 below that for the previous week, 2·8 below the mean of the rates for the three preceding weeks, but 3·3 below that for the corresponding week of last year. The death-rate for the week is 1·0 below that for the previous week, 1·8 below the mean of the rates for the three preceding weeks, and 1·9 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·1 in Coatbridge, 19·6 in Ayr, and 16·8 in Falkirk, to 1·4 in Hamilton, 5·6 in Kilmarnock, and 8·5 in Aberdeen. In Perth it was 14·5, in Dundee 14·3, in Edinburgh 13·8, in Paisley 13·6, in Motherwell and Wishaw 12·0, in Glasgow 11·9, in Greenock 10·6, in Clydebank 9·7, and in Kirkcaldy 9·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 30. They are 28 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 0 from enteric fever, 3 from measles, 2 from scarlet fever, 14 from whooping-cough, 6 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 14 fewer, from diphtheria 5 fewer, from the diarrhoeas of childhood 5 fewer, from measles 3 fewer, and from scarlet fever 1 fewer.

Deaths from influenza numbered 5. They are the same as in the previous week, but 9 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 80. They are 3 fewer than in the previous week.

Deaths of children of less than one year old numbered 81, and those of persons of sixty-five and upwards 159. The former are 37 fewer than in the previous week, and 58 fewer than in the corresponding week of last year. The latter are 12 fewer than in the previous week, and 8 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 25. They are 4 more than in the previous week, but number the same as in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 53°·2, being 2°·0 above that for the previous week, but 3°·1 below that for the corresponding week of last year. The mean rainfall was 0·40 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 22. Week ending SATURDAY, JUNE 4, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 4th June 1921 the births of 1376 living children, the deaths of 576 persons, and 425 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 559. The equivalent annual birth-rate is 29·3 per thousand, and the death-rate, corrected, 11·9.

The birth-rate for the week is 2·5 above that for the previous week, 0·8 above the mean of the rates for the three preceding weeks, and 0·6 above that for the corresponding week of last year. The death-rate for the week is 0·4 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 1·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·1 in Kilmarnock, 16·9 in Kirkcaldy, and 14·8 in Aberdeen, to 8·3 in Motherwell and Wishaw, 8·7 in Perth, and 9·0 in Ayr. In Edinburgh it was 13·7, in Greenock 12·6, in Paisley 12·4, in Hamilton 12·3, in Glasgow 11·0, in Dundee 10·7, in Falkirk 10·7, in Clydebank 9·7, and in Coatbridge 9·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49. They are 19 more than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include 0 from enteric fever, 4 from measles, 1 from scarlet fever, 28 from whooping cough, 4 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 14 more, from the diarrhoeas of childhood 7 more, and from measles 1 more, while those from scarlet fever are 1 fewer, and from diphtheria 2 fewer.

Deaths from influenza numbered 3. They are 2 fewer than in the previous week, and 6 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 73. They are 7 fewer than in the previous week.

Deaths of children of less than one year old numbered 111, and those of persons of sixty-five and upwards 146. The former are 30 more than in the previous week, but 10 fewer than in the corresponding week of last year. The latter are 13 fewer than in the previous week, and 15 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 16. They are 9 fewer than in the previous week, and 10 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 53°·4, being 0°·2 above that for the previous week, and 0°·3 above that for the corresponding week of last year. The mean rainfall was 0·70 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 23. Week ending SATURDAY, JUNE 11, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 11th June 1921 the births of 1303 living children, the deaths of 576 persons, and 628 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 568. The equivalent annual birth-rate is 27·8 per thousand, and the death-rate, corrected, 12·1.

The birth-rate for the week is 1·5 below that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, and 0·9 below that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, but 0·4 below the mean of the rates for the three preceding weeks, and 0·6 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·6 in Greenock, 15·0 in Hamilton, and 14·1 in Coatbridge, to 5·3 in Motherwell and Wishaw, 5·8 in Perth, and 8·9 in Paisley. In Dundee it was 13·5, in Aberdeen 13·3, in Glasgow 12·8, in Ayr 12·0, in Kirkcaldy 11·7, in Kilmarnock 11·3, in Edinburgh 10·2, in Clydebank 9·7, and in Falkirk 9·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 30. They are 19 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 3 from enteric fever, 1 from measles, 3 from scarlet fever, 17 from whooping cough, 4 from diphtheria, and 2 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 3 more, and from scarlet fever 2 more, but those from diphtheria number the same, while from measles they are 3 fewer, from the diarrhoeas of childhood 10 fewer, and from whooping-cough 11 fewer.

Deaths from influenza numbered 8. They are 5 more than in the previous week, and 3 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 67. They are 6 fewer than in the previous week.

Deaths of children of less than one year old numbered 95, and those of persons of sixty-five and upwards 175. The former are 16 fewer than in the previous week, and 24 fewer than in the corresponding week of last year. The latter are 29 more than in the previous week, and 30 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are 8 more than in the previous week, but 2 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 54°·6, being 1°·2 above that for the previous week, and 2°·5 above that for the corresponding week of last year. The mean rainfall was 0·26 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 24. Week ending SATURDAY, JUNE 18, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 18th June 1921 the births of 1381 living children, the deaths of 594 persons, and 516 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 567. The equivalent annual birth-rate is 29·4 per thousand, and the death-rate, corrected, 12·1.

The birth-rate for the week is 1·6 above that for the previous week, and 1·4 above the mean of the rates for the three preceding weeks, but 0·2 below that for the corresponding week of last year. The death-rate for the week is the same as that for the previous week, the same as the mean of the rates for the three preceding weeks, but 1·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·8 in Motherwell and Wishaw, 15·3 in Greenock and 13·0 in Perth, to 5·2 in Kirkcaldy, 8·6 in Clydebank and 9·0 in Ayr. In Kilmarnock it was 12·7, in Aberdeen 12·6, in Paisley 12·4, in Edinburgh 12·2, in Dundee 12·1, in Glasgow 12·0, in Hamilton 9·6, in Coatbridge 9·4, and in Falkirk 9·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 38. They are 8 more than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 0 from enteric fever, 0 from measles, 2 from scarlet fever, 25 from whooping-cough, 4 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 8 more, and those from the diarrhoeas of childhood 5 more, but those from diphtheria number the same, while those from enteric fever are 3 fewer, and those from measles and from scarlet fever each 1 fewer.

No deaths from influenza were registered during the week.

Deaths from respiratory diseases numbered 60. They are 7 fewer than in the previous week.

Deaths of children of less than one year old numbered 79, and those of persons of sixty-five and upwards 188. The former are 16 fewer than in the previous week, and 42 fewer than in the corresponding week of last year. The latter are 13 more than in the previous week, but 10 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 16. They are 8 fewer than in the previous week, but are the same as in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 57°·5, being 2°·9 above that for the previous week, but 1°·8 below that for the corresponding week of last year. The mean rainfall was 0·11 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 25. Week ending SATURDAY, JUNE 25, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 25th June 1921 the births of 1247 living children, the deaths of 575 persons, and 528 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 552. The equivalent annual birth-rate is 26·6 per thousand, and the death-rate, corrected, 11·8.

The birth-rate for the week is 2·8 below that for the previous week, 2·2 below the mean of the rates for the three preceding weeks, and 1·7 below that for the corresponding week of last year. The death-rate for the week is 0·3 below that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, but 0·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·6 in Ayr, 18·2 in Kirkealdy, and 16·9 in Kilmarnock, to 6·8 in Hamilton, 8·8 in Aberdeen, and 9·1 in Falkirk. In Clydebank it was 16·1, in Paisley 13·0, in Greenock 12·6, in Dundee 12·1, in Glasgow 11·9, in Edinburgh 11·2, in Perth 10·1, in Motherwell and Wishaw, 9·8, and in Coatbridge 9·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 42. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 1 from enteric fever, 1 from measles, 3 from scarlet fever, 25 from whooping-cough, 2 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 3 more, and those from enteric fever, measles and scarlet fever are each 1 more, but those from whooping-cough number the same, while those from diphtheria are 2 fewer.

Deaths from influenza numbered 2. They are 2 more than in the previous week, but 6 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 67. They are 7 more than in the previous week.

Deaths of children of less than one year old numbered 95, and those of persons of sixty-five and upwards 151. The former are 16 more than in the previous week, but 4 fewer than in the corresponding week of last year. The latter are 37 fewer than in the previous week, but 19 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 20. They are 4 more than in the previous week, but 2 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 57°·5, being the same as that for the previous week, but 0·5 above that for the corresponding week of last year. The mean rainfall was 0·20 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 26. Week ending SATURDAY, JULY 2, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 2nd July 1921 the births of 1217 living children, the deaths of 543 persons, and 661 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 524. The equivalent annual birth-rate is 25·9 per thousand, and the death-rate, corrected, 11·2.

The birth-rate for the week is 0·7 below that for the previous week, 2·0 below the mean of the rates for the three preceding weeks, and 1·2 below that for the corresponding week of last year. The death-rate for the week is 0·6 below that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, but 0·1 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·3 in Falkirk, 15·9 in Perth, and 15·6 in Kirkealdy, to 4·1 in Hamilton, 5·4 in Clydebank, and 7·7 in Paisley. In Coatbridge it was 12·9, in Edinburgh 12·3, in Ayr 12·0, in Glasgow 11·7, in Dundee 10·1, in Kilmarnock 9·9, in Aberdeen 9·2, in Motherwell and Wishaw 9·0, and in Greenock 8·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 39. They are 3 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 0 from enteric fever, 1 from measles, 1 from scarlet fever, 19 from whooping-cough, 4 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 4 more, and from diphtheria 2 more, while those from measles number the same, but those from enteric fever are 1 fewer, those from scarlet fever 2 fewer, and those from whooping-cough 6 fewer.

Deaths from influenza numbered 3. They are 1 more than in the previous week, and 1 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 55. They are 12 fewer than in the previous week.

Deaths of children of less than one year old numbered 83, and those of persons of sixty-five and upwards 144. The former are 12 fewer than in the previous week, and 15 fewer than in the corresponding week of last year. The latter are 7 fewer than in the previous week, but 6 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 35. They are 15 more than in the previous week, and 15 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 57°·2, being 0°·3 below that for the previous week, but 2°·1 above that for the corresponding week of last year. The mean rainfall was 0·00 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 27. Week ending SATURDAY, JULY 9, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 9th July 1921 the births of 1195 living children, the deaths of 545 persons, and 536 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 515. The equivalent annual birth-rate is 25·5 per thousand, and the death-rate, corrected, 11·0.

The birth-rate for the week is 0·4 below that for the previous week, 1·8 below the mean of the rates for the three preceding weeks, and 3·0 below that for the corresponding week of last year. The death-rate for the week is 0·2 below that for the previous week, 0·7 below the mean of the rates for the three preceding weeks, and 1·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·6 in Greenock, 13·7 in Falkirk, and 13·0 in Paisley, to 6·5 in Kirkcaldy, 7·0 in Kilmarnock, and 7·5 in Ayr. In Hamilton it was 12·3, in Dundee 12·1, in Glasgow 11·8, in Coatbridge 11·7, in Motherwell and Wishaw 11·3, in Perth 10·1, in Aberdeen 9·8, in Clydebank 9·7, and in Edinburgh 8·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 35. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 1 from enteric fever, 2 from measles, 3 from scarlet fever, 12 from whooping-cough, 8 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, from scarlet fever 2 more, from enteric fever 1 more, and from measles 1 more, but those from the diarrhoeas of childhood are 5 fewer, and from whooping-cough 7 fewer.

Deaths from influenza numbered 1. They are 2 fewer than in the previous week, and 2 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 61. They are 6 more than in the previous week.

Deaths of children of less than one year old numbered 81, and those of persons of sixty-five and upwards 156. The former are 2 fewer than in the previous week, and 8 fewer than in the corresponding week of last year. The latter are 12 more than in the previous week, and 12 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 20. They are 15 fewer than in the previous week, and 11 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 62°·9, being 5°·7 above that for the previous week, and 8°·3 above that for the corresponding week of last year. The mean rainfall was 0·12 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 28. Week ending SATURDAY, JULY 16, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have an estimated population of 2,446,100, there were registered during the week ending 16th July 1921 the births of 1204 living children, the deaths of 508 persons, and 552 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 491. The equivalent annual birth-rate is 25·7 per thousand, and the death-rate, corrected, 10·5.

The birth-rate for the week is 0·2 above that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year. The death-rate for the week is 0·5 below that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, and 0·6 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 15·5 in Kilmarnock, 12·3 in Aberdeen and in Hamilton, to 5·2 in Kirkcaldy, 7·3 in Greenock, and 7·5 in Ayr. In Edinburgh it was 11·8, in Motherwell and Wishaw 11·3, in Glasgow and in Clydebank 10·7, in Perth 10·1, in Falkirk 9·1, in Coatbridge 8·2, in Dundee 7·9, and in Paisley 7·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 43. They are 8 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 2 from enteric fever, 2 from measles, 1 from scarlet fever, 17 from whooping-cough, 3 from diphtheria, and 18 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 9 more, from whooping-cough 5 more, and from enteric fever 1 more, while those from measles number the same, from scarlet fever 2 fewer, and from diphtheria 5 fewer.

Deaths from influenza numbered 3. They are 2 more than in the previous week, but 2 fewer than in the corresponding week of last year.

Deaths from respiratory diseases numbered 53. They are 8 fewer than in the previous week.

Deaths of children of less than one year old numbered 89, and those of persons of sixty-five and upwards 134. The former are 8 more than in the previous week, but 9 fewer than in the corresponding week of last year. The latter are 22 fewer than in the previous week, but 2 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 20. They are the same as in the previous week, but 7 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 62°·0, being 0°·9 below that for the previous week, but 4°·5 above that for the corresponding week of last year. The mean rainfall was 0·47 inch.

Note :— Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

* Cerebro-spinal meningitis.

† 4 Small-pox; 2 Cerebro-spinal meningitis.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 29. Week ending SATURDAY, JULY 23, 1921. Price 2d. net.

Population figures derived from the recent Census are included in this week's Report. They show that the populations of the Fifteen Principal Towns collectively amount to 2,323,800, which is 122,300, or 5·0 per cent., less than the provisional estimate recently in use. In view of this and for personal purposes of fair comparison the birth and death rates of recent weeks have been adjusted. The recent Census has shown that one additional burgh has a population over 30,000 and falls to be added to the 15 presently included for the purpose of this Report, that burgh being Dunfermline. Its inclusion in the Weekly Report will shortly be given effect to.

In the Fifteen Principal Towns of Scotland, collectively having a population of 2,323,800, there were registered during the week ending 23rd July the births of 1179 living children, the deaths of 566 persons, and 754 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 542. The equivalent annual birth-rate is 26·5 per thousand, and the death-rate, corrected, is 12·2 per thousand.

The birth-rate of the week is 0·5 less than that of the previous week, and 0·5 less than the mean of those of the three preceding weeks, but is 0·1 more than that of the corresponding week of last year. The death-rate of the week is 1·7 more than that of the previous week, 0·7 more than the mean of those of the three preceding weeks, and 0·6 more than that of the corresponding week of last year.

In the individual towns the death-rate ranged from 17·2 in Falkirk, 14·9 in Dundee, and 14·6 in Ayr, to 6·3 in Perth, 9·2 in Paisley, 9·5 in Coatbridge, and 9·8 in Motherwell and Wishaw. In Hamilton this rate was 13·2, in Aberdeen 12·5, in Glasgow 12·4, in Edinburgh 12·0, in Greenock 11·6, in Clydebank 11·2, in Kirkcaldy 10·5, and in Kilmarnock 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34. They are 9 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 2 from enteric fever, 1 from measles, 5 from scarlet fever, 8 from whooping-cough, 3 from diphtheria, and 15 from the diarrhoeas of childhood. Compared with the returns of the previous week, deaths from whooping-cough are 9 fewer, from the diarrhoeas of childhood 3 fewer, and from measles 1 fewer, while those from enteric fever and diphtheria are of the same number, and those from scarlet fever are 4 more.

Deaths from respiratory diseases numbered 58. They are 5 more than in the previous week.

Deaths among children of less than one year old numbered 89, and among persons of sixty-five and upwards 157. The former are of the same number as in the previous week, but 27 fewer than in the corresponding week of last year. The latter are 23 more than in the previous week, and 4 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 35. They are 15 more than in the previous week, and 8 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 62°·1, being 0°·1 above that for the previous week, and 5°·4 above that for the corresponding week of last year. The mean rainfall was 0·40 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 30. Week ending SATURDAY, JULY 30, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,800, there were registered during the week ending 30th July 1921 the births of 1236 living children, the deaths of 538 persons, and 467 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 535. The equivalent annual birth-rate is 27·7 per thousand, and the death-rate, corrected, 12·0.

The birth-rate for the week is 1·2 above that for the previous week, 0·9 above the mean of the rates for the three preceding weeks, but 0·3 below that for the corresponding week of last year. The death-rate for the week is 0·2 below that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, and 0·8 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·5 in Kilmarnock, 15·7 in Perth, and 13·3 in Glasgow, to 5·8 in Ayr, 6·7 in Clydebank, and 7·1 in Coatbridge. In Aberdeen it was 13·1, in Greenock 12·3, in Edinburgh 11·8, in Hamilton 10·6, in Kirkcaldy 10·5, in Dundee 9·9, in Motherwell and Wishaw 9·1, in Paisley 8·6, and in Falkirk 7·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 63. They are 29 more than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include 0 from enteric fever, 0 from measles, 7 from scarlet fever, 12 from whooping-cough, 1 from diphtheria, and 43 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 28 more, from whooping-cough 4 more, and from scarlet fever 2 more, while those from diphtheria are 2 fewer.

Deaths from respiratory diseases numbered 47. They are 11 fewer than in the previous week.

Deaths of children of less than one year old numbered 107, and those of persons of sixty-five and upwards 165. The former are 18 more than in the previous week, and 29 more than in the corresponding week of last year. The latter are 8 more than in the previous week, and 14 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 21. They are 14 fewer than in the previous week, and 5 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 56°·3, being 5°·8 below that for the previous week, but 1°·1 above that for the corresponding week of last year. The mean rainfall was 2·09 inches.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 81. Week ending SATURDAY, AUGUST 6, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,800, there were registered during the week ending 6th August 1921 the births of 1179 living children, the deaths of 568 persons, and 424 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 564. The equivalent annual birth-rate is 26·5 per thousand, and the death-rate, corrected, 12·7.

The birth-rate for the week is 1·2 below that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year. The death-rate for the week is 0·7 above that for the previous week, 1·0 above the mean of the rates for the three preceding weeks, and 1·6 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·2 in Coatbridge, 18·6 in Greenock, and 14·4 in Motherwell and Wishaw, to 4·4 in Ayr, 6·3 in Perth, and 7·8 in Clydebank. In Glasgow it was 13·5, in Paisley 12·3, in Aberdeen 12·1, in Edinburgh 11·8, in Dundee 11·5, in Kirkcaldy 10·5, in Kilmarnock 10·2, in Falkirk 9·4, and in Hamilton 9·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 59. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include 0 from enteric fever, 1 from measles, 0 from scarlet fever, 6 from whooping-cough, 4 from diphtheria, and 48 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 5 more, from diphtheria 3 more, from measles 1 more, while those from whooping-cough are 6 fewer and from scarlet fever 7 fewer.

Deaths from influenza numbered 1. They are 1 fewer than in the previous week, but are of the same number as in the corresponding week of last year.

Deaths from respiratory diseases numbered 57. They are 10 more than in the previous week.

Deaths of children of less than one year old numbered 133, and those of persons of sixty-five and upwards 152. The former are 26 more than in the previous week, and 51 more than in the corresponding week of last year. The latter are 13 fewer than in the previous week, but 3 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 2 more than in the previous week, but 5 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 58°·8, being 2°·5 above that for the previous week, and 4°·1 above that for the corresponding week of last year. The mean rainfall was 0·89 inch.

Note — Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

* Cerebro-spinal meningitis.
† 2 Small-pox; 1 Cerebro-spinal meningitis.
‡ 2 Small-pox; 4 Cerebro-spinal meningitis.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 82. Week ending SATURDAY, AUGUST 13, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,800, there were registered during the week ending 13th August 1921 the births of 1163 living children, the deaths of 557 persons, and 329 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 547. The equivalent annual birth-rate is 26·1 per thousand, and the death-rate, corrected, 12·3.

The birth-rate for the week is 0·4 below that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, and 1·5 below that for the corresponding week of last year. The death-rate for the week is 0·4 below that for the previous week, and is the same as the mean of the rates for the three preceding weeks, and that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·1 in Kirkcaldy, 16·1 in Greenock, and 14·6 in Hamilton and in Kilmarnock, to 4·5 in Clydebank, 6·8 in Motherwell and Wishaw, and 10·0 in Edinburgh. In Dundee and Coatbridge it was 14·3, in Perth 14·1, in Glasgow 13·1, in Ayr 11·7, in Aberdeen 11·5, in Paisley 11·1, and in Falkirk 11·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 51. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 0 from enteric fever, 2 from measles, 3 from scarlet fever, 6 from whooping-cough, 3 from diphtheria, and 37 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 3 more, from measles 1 more, but those from whooping-cough are of the same number, while those from diphtheria are 1 fewer and from the diarrhoeas of childhood 11 fewer.

Deaths from influenza numbered 3. They are 2 more than in the previous week, and 2 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 62. They are 5 more than in the previous week.

Deaths of children of less than one year old numbered 116, and those of persons of sixty-five and upwards 136. The former are 17 fewer than in the previous week, but 20 more than in the corresponding week of last year. The latter are 16 fewer than in the previous week, and 34 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are of the same number as in the previous week, but 1 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 55°·3, being 3°·5 below that for the previous week, and 2°·7 below that for the corresponding week of last year. The mean rainfall was 0·84 inch.

EDINBURGH: PUBLISHED BY HIS MAJESTY'S STATIONERY OFFICE

To be purchased through any Bookseller or directly from H.M. STATIONERY OFFICE at the following addresses:
 23, FORTH STREET, EDINBURGH;

Note :—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

* (Cerebro-spinal meningitis).
† Small-pox.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 83. Week ending SATURDAY, AUGUST 20, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,800, there were registered during the week ending 20th August 1921 the births of 1084 living children, the deaths of 577 persons, and 340 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 567. The equivalent annual birth-rate is 24·3 per thousand, and the death-rate, corrected, 12·7.

The birth-rate for the week is 1·8 below that for the previous week, 2·5 below the mean of the rates for the three preceding weeks, and 0·7 below that for the corresponding week of last year. The death-rate for the week is 0·4 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, and 1·9 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·2 in Falkirk, 16·1 in Greenock, and 14·6 in Kilmarnock, to 7·9 in Kirkealdy and in Hamilton, and 10·2 in Ayr. In Aberdeen it was 14·4, in Paisley and in Perth 14·1, in Coatbridge 13·1, in Edinburgh 12·9, in Glasgow 12·5, in Dundee 12·1, in Clydebank 11·2, and in Motherwell and Wishaw 10·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 65. They are 14 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 1 from enteric fever, 1 from measles, 6 from scarlet fever, 12 from whooping-cough, 1 from diphtheria, and 44 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 7 more, from whooping-cough 6 more, from scarlet fever 3 more, and from enteric fever 1 more; while those from measles are 1 fewer, and from diphtheria 2 fewer.

Deaths from influenza numbered 3. They are of the same number as in the previous week, but 1 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 55. They are 7 fewer than in the previous week.

Deaths of children of less than one year old numbered 120, and those of persons of sixty-five and upwards 157. The former are 4 more than in the previous week, and 31 more than in the corresponding week of last year. The latter are 21 more than in the previous week, and 38 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 26. They are 3 more than in the previous week, but 2 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 56°·9, being 1°·6 above that for the previous week, and 3°·3 above that for the corresponding week of last year. The mean rainfall was 1·27 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN FIFTEEN PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 34. Week ending SATURDAY, AUGUST 27, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,800, there were registered during the week ending 27th August 1921 the births of 1192 living children, the deaths of 585 persons, and 330 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 566. The equivalent annual birth-rate is 26·7 per thousand, and the death-rate, corrected, 12·7.

The birth-rate for the week is 2·4 above that for the previous week, 1·1 above the mean of the rates for the three preceding weeks, and 1·8 above that for the corresponding week of last year. The death-rate for the week is the same as that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, and 1·6 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·9 in Ayr, 17·2 in Falkirk, and 16·6 in Coatbridge, to 5·3 in Hamilton, 6·6 in Kirkcaldy, and 9·8 in Motherwell and Wishaw. In Kilmarnock it was 16·0, in Dundee 14·3, in Paisley and in Perth 14·1, in Edinburgh 12·7, in Glasgow 12·6, in Clydebank 12·3, in Aberdeen 11·8, and in Greenock 10·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 68. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 1 from enteric fever, 1 from measles, 4 from scarlet fever, 11 from whooping-cough, 2 from diphtheria, and 49 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 5 more, and from diphtheria 1 more, but those from enteric fever and measles number the same, while those from whooping-cough are 1 fewer, and from scarlet fever 2 fewer.

Deaths from influenza numbered 3. They number the same as in the previous week and in the corresponding week of last year.

Deaths from respiratory diseases numbered 58. They are 3 more than in the previous week.

Deaths of children of less than one year old numbered 138, and those of persons of sixty-five and upwards 160. The former are 18 more than in the previous week, and 31 more than in the corresponding week of last year. The latter are 3 more than in the previous week, and 30 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 22. They are 4 fewer than in the previous week, and 9 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 57°·4, being 0°·5 above that for the previous week, and 1°·3 above that for the corresponding week of last year. The mean rainfall was 1·16 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 35. Week ending SATURDAY, SEPTEMBER 3, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 3rd September 1921 the births of 1082 living children, the deaths of 539 persons, and 484 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 533. The equivalent annual birth-rate is 24·3 per thousand, and the death-rate, corrected, 12·0.

The birth-rate for the week is 2·4 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 1·0 below that for the corresponding week of last year. The death-rate for the week is 0·7 below that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, but 2·2 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·0 in Ayr, 14·4 in Motherwell and Wishaw, and 14·1 in Paisley and in Falkirk, to 6·6 in Kirkcaldy and in Hamilton, and 7·3 in Kilmarnock. In Glasgow it was 12·9, in Greenock 12·9, in Dundee 12·7, in Perth 12·6, in Coatbridge 11·9, in Aberdeen 11·5, in Edinburgh 9·6, and in Clydebank 7·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 62. They are 6 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include 1 from enteric fever, 1 from measles, 2 from scarlet fever, 4 from whooping-cough, 4 from diphtheria, and 50 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 2 more and from the diarrhoeas of childhood 1 more, while from enteric fever and from measles they number the same, but from scarlet fever they are 2 fewer and from whooping-cough 7 fewer.

Deaths from respiratory diseases numbered 71. They are 13 more than in the previous week.

Deaths of children of less than one year old numbered 112, and those of persons of sixty-five and upwards 148. The former are 26 fewer than in the previous week, but 33 more than in the corresponding week of last year. The latter are 12 fewer than in the previous week, but 19 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 1 more than in the previous week, but 1 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 53°·1, being 4°·3 below that for the previous week, and 1°·1 below that for the corresponding week of last year. The mean rainfall was 1·20 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 36. Week ending SATURDAY, SEPTEMBER 10, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 10th September 1921 the births of 1224 living children, the deaths of 578 persons, and 494 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 574. The equivalent annual birth-rate is 27·5 per thousand, and the death-rate, corrected, 12·9.

The birth-rate for the week is 3·2 above that for the previous week, 2·4 above the mean of the rates for the three preceding weeks, and 3·0 above that for the corresponding week of last year. The death-rate for the week is 0·9 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, and 1·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·7 in Aberdeen, 16·1 in Ayr, and 15·4 in Coatbridge, to 5·6 in Clydebank, 9·4 in Perth, and 9·8 in Paisley. In Greenock it was 14·8, in Hamilton 14·6, in Kirkcaldy 14·5, in Glasgow 13·6, in Dundee 11·8, in Edinburgh 11·4, in Falkirk 11·0, in Motherwell and Wishaw 10·6, and in Kilmarnock 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 62. They are the same as in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include 1 from enteric fever, 3 from measles, 0 from scarlet fever, 6 from whooping-cough, 8 from diphtheria, and 44 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, from measles 2 more, and from whooping-cough 2 more, while from enteric fever they number the same, from scarlet fever 2 fewer, and from the diarrhoeas of childhood 6 fewer.

Deaths from respiratory diseases numbered 71. They are the same as in the previous week.

Deaths of children of less than one year old numbered 125, and those of persons of sixty-five and upwards 170. The former are 13 more than in the previous week, and 35 more than in the corresponding week of last year. The latter are 22 more than in the previous week, and 27 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are the same as in the previous week, but 7 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 60°·2, being 7°·1 above that for the previous week, and 5°·6 above that for the corresponding week of last year. The mean rainfall was 0·47 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 37. Week ending SATURDAY, SEPTEMBER 17, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 17th September 1921 the births of 1146 living children, the deaths of 501 persons, and 447 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 493. The equivalent annual birth-rate is 25·7 per thousand, and the death-rate, corrected, 11·1.

The birth-rate for the week is 2·0 below that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, but 1·1 above that for the corresponding week of last year. The death-rate for the week is 1·8 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·0 in Perth, 14·3 in Coatbridge, and 11·7 in Ayr, to 4·7 in Falkirk, 6·7 in Clydebank, and 7·4 in Paisley. In Greenock it was 11·6, in Dundee 11·5, in Edinburgh 11·4, in Motherwell and Wishaw 11·4, in Glasgow 11·2, in Aberdeen 10·8, in Hamilton 9·3, in Kirkcaldy 9·2, and in Kilmarnock 8·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 42. They are 20 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 1 from enteric fever, 0 from measles, 0 from scarlet fever, 4 from whooping-cough, 3 from diphtheria, and 34 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 10 fewer, from diphtheria 5 fewer, from measles 3 fewer, and from whooping-cough 2 fewer, while from enteric fever they number the same.

Deaths from respiratory diseases numbered 50. They are 21 fewer than in the previous week.

Deaths of children of less than one year old numbered 87, and those of persons of sixty-five and upwards 146. The former are 38 fewer than in the previous week, and 10 fewer than in the corresponding week of last year. The latter are 24 fewer than in the previous week, and 3 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 26. They are 3 more than in the previous week, and 6 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 50°·5, being 9°·7 below that for the previous week, and 2°·2 below that for the corresponding week of last year. The mean rainfall was 0·94 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 38. Week ending SATURDAY, SEPTEMBER 24, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 24th September 1921 the births of 1222 living children, the deaths of 614 persons, and 465 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of residents dying elsewhere in Scotland, is 592. The equivalent annual birth-rate is 27·4 per thousand, and the death-rate, corrected, 13·3.

The birth-rate for the week is 1·7 above that for the previous week, 1·5 above the mean of the rates for the three preceding weeks, and 1·5 above that for the corresponding week of last year. The death-rate for the week is 2·2 above that for the previous week, 1·3 above the mean of the rates for the three preceding weeks, and 0·9 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·4 in Perth, 19·0 in Coatbridge, and 18·4 in Aberdeen, to 4·5 in Greenock, 6·1 in Motherwell and Wishaw, and 9·2 in Kirkcaldy. In Hamilton it was 15·9, in Dundee 15·5, in Edinburgh 14·1, in Glasgow 13·0, in Falkirk 12·5, in Kilmarnock 11·7, in Ayr 11·7, in Clydebank 11·2, and in Paisley 11·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 44. They are 2 more than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include 2 from enteric fever, 0 from measles, 1 from scarlet fever, 5 from whooping-cough, 5 from diphtheria, and 31 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 2 more, from enteric fever, scarlet fever, and whooping-cough each 1 more, while those from the diarrhoeas of childhood are 3 fewer.

Deaths from respiratory diseases numbered 82. They are 32 more than in the previous week.

Deaths of children of less than one year old numbered 135, and those of persons of sixty-five and upwards 178. The former are 48 more than in the previous week, and 18 more than in the corresponding week of last year. The latter are 32 more than in the previous week, and 44 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are 2 fewer than in the previous week, but 3 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 55°·3, being 4°·8 above that for the previous week, and 5°·5 above that for the corresponding week of last year. The mean rainfall was 0·16 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 39. Week ending SATURDAY, OCTOBER 1, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 1st October 1921 the births of 1167 living children, the deaths of 517 persons, and 460 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 503. The equivalent annual birth-rate is 26·2 per thousand, and the death-rate, corrected, 11·3.

The birth-rate for the week is 1·2 below that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, and 1·7 above that for the corresponding week of last year. The death-rate for the week is 2·0 below that for the previous week, 1·1 below the mean of the rates for the three preceding weeks, and 0·8 below that for the corresponding week of last year.

In the individual towns the death rate ranged from 17·5 in Kilmarnock, 14·1 in Greenock, and 13·4 in Aberdeen, to 4·0 in Kirkealdy, 6·1 in Motherwell and Wishaw, and 7·1 in Coatbridge. In Edinburgh it was 12·8, in Falkirk 12·5, in Hamilton 11·9, in Paisley 11·7, in Dundee 11·5, in Perth 11·0, in Glasgow 10·8, in Clydebank 9·0, and in Ayr 7·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 47. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 0 from enteric fever, 0 from measles, 2 from scarlet fever, 6 from whooping-cough, 9 from diphtheria, and 30 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, from scarlet fever 1 more, and from whooping-cough 1 more, while those from the diarrhoeas of childhood are 1 fewer.

Deaths from respiratory diseases numbered 53. They are 29 fewer than in the previous week.

Deaths of children of less than one year old numbered 102, and those of persons of sixty-five and upwards 138. The former are 33 fewer than in the previous week, and 11 fewer than in the corresponding week of last year. The latter are 40 fewer than in the previous week, and 34 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 30. They are 6 more than in the previous week, and 8 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 55°·1, being 0°·2 below that for the previous week, and 1°·4 below that for the corresponding week of last year. The mean rainfall was 0·65 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 40. Week ending SATURDAY, OCTOBER 8, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 8th October 1921 the births of 1228 living children, the deaths of 544 persons, and 421 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 547. The equivalent annual birth-rate is 27·6 per thousand, and the death-rate, corrected, 12·3.

The birth-rate for the week is 1·4 above that for the previous week, 1·2 above the mean of the rates for the three preceding weeks, but the same as that for the corresponding week of last year. The death-rate for the week is 0·8 above that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, but 0·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·6 in Kilmarnock, 13·6 in Glasgow, and 13·3 in Dundee, to 4·4 in Ayr, 6·7 in Clydebank, and 8·0 in Paisley. In Hamilton it was 13·2, in Perth 12·6, in Edinburgh 12·2, in Kirkcaldy 11·9, in Aberdeen 11·8, in Falkirk 11·0, in Greenock 9·6, in Coatbridge 9·5, and in Motherwell and Wishaw 8·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 39. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 0 from enteric fever, 1 from measles, 3 from scarlet fever, 8 from whooping-cough, 2 from diphtheria, and 25 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 2 more, from measles 1 more, and from scarlet fever 1 more, but those from the diarrhoeas of childhood are 5 fewer, and from diphtheria 7 fewer.

Deaths from respiratory diseases numbered 71. They are 18 more than in the previous week.

Deaths of children of less than one year old numbered 124, and those of persons of sixty-five and upwards 149. The former are 22 more than in the previous week, and 3 more than in the corresponding week of last year. The latter are 11 more than in the previous week, but 30 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 22. They are 8 fewer than in the previous week, and 3 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 55°·1, being the same as that for the previous week, and 1°·6 above that for the corresponding week of last year. The mean rainfall was 1·03 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 41. Week ending SATURDAY, OCTOBER 15, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 15th October 1921 the births of 1270 living children, the deaths of 595 persons, and 325 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 573. The equivalent annual birth-rate is 28·5 per thousand, and the death-rate, corrected, 12·9.

The birth-rate for the week is 0·9 above that for the previous week, 1·4 above the mean of the rates for the three preceding weeks, and 1·3 above that for the corresponding week of last year. The death-rate for the week is 0·6 above that for the previous week, 0·5 above the mean of the rates for the three preceding weeks, and 1·4 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·2 in Motherwell and Wishaw, 16·1 in Ayr, and 14·8 in Greenock, to 7·9 in Hamilton, 10·1 in Clydebank, and 10·3 in Edinburgh. In Kirkcaldy it was 14·5, in Coatbridge 14·3, in Perth 14·1, in Glasgow 13·5, in Paisley 13·5, in Kilmarnock 13·1, in Dundee 13·0, in Falkirk 12·5, and in Aberdeen 12·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 53. They are 14 more than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 1 from enteric fever, 0 from measles, 4 from scarlet fever, 5 from whooping-cough, 8 from diphtheria, and 35 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 10 more, from diphtheria 6 more, from enteric fever 1 more, and from scarlet fever 1 more, while those from whooping-cough are 3 fewer.

Deaths from respiratory diseases numbered 78. They are 7 more than in the previous week.

Deaths of children of less than one year old numbered 117, and those of persons of sixty-five and upwards 156. The former are 7 fewer than in the previous week, and 3 fewer than in the corresponding week of last year. The latter are 7 more than in the previous week, and 17 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 20. They are 2 fewer than in the previous week, and 2 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 54°·7, being 0°·4 below that for the previous week, but 3°·9 above that for the corresponding week of last year. The mean rainfall was 0·51 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 42. Week ending SATURDAY, OCTOBER 22, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 22nd October 1921 the births of 1231 living children, the deaths of 561 persons, and 343 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 561. The equivalent annual birth-rate is 27·6 per thousand, and the death-rate, corrected, 12·6.

The birth-rate for the week is 0·9 below that for the previous week, 0·2 above the mean of the rates for the three preceding weeks, and 0·2 above that for the corresponding week of last year. The death-rate for the week is 0·3 below that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, and 0·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 24·9 in Coatbridge, 23·5 in Perth, and 17·4 in Greenock, to 4·5 in Clydebank, 7·3 in Kilmarnock, and 8·3 in Motherwell and Wishaw. In Edinburgh it was 13·8, in Aberdeen 13·1, in Glasgow 12·4, in Dundee 12·1, in Hamilton 10·6, in Ayr 10·2, in Falkirk 9·4, in Paisley 9·2, and in Kirkcaldy 9·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 38. They are 15 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 0 from enteric fever, 0 from measles, 2 from scarlet fever, 4 from whooping-cough, 4 from diphtheria, and 28 from the diarrhœas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 1 fewer, from scarlet fever 2 fewer, from diphtheria 4 fewer, and from the diarrhœas of childhood 7 fewer.

Deaths from respiratory diseases numbered 81. They are 3 more than in the previous week.

Deaths of children of less than one year old numbered 123, and those of persons of sixty-five and upwards 142. The former are 6 more than in the previous week, and 10 more than in the corresponding week of last year. The latter are 14 fewer than in the previous week, but 5 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 21. They are 1 more than in the previous week, but 7 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 51°·1, being 3°·6 below that for the previous week, but 2°·9 above that for the corresponding week of last year. The mean rainfall was 1·46 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 43. Week ending SATURDAY, OCTOBER 29, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 29th October 1921 the births of 1132 living children, the deaths of 609 persons, and 354 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 593. The equivalent annual birth-rate is 25·4 per thousand, and the death-rate, corrected, 13·3.

The birth-rate for the week is 2·2 below that for the previous week, 2·5 below the mean of the rates for the three preceding weeks, but is the same as that for the corresponding week of last year. The death-rate for the week is 0·7 above that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, but 0·6 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·6 in Coatbridge, 18·8 in Falkirk, and 17·0 in Dundee, to 5·6 in Clydebank, 7·3 in Kilmarnock, and 7·9 in Kirkcaldy. In Perth it was 15·7, in Motherwell and Wishaw 15·1, in Glasgow 13·5, in Hamilton 13·2, in Aberdeen 13·1, in Edinburgh 12·8, in Greenock 11·6, in Ayr 10·2, and in Paisley 9·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 28. They are 10 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 1 from enteric fever, 0 from measles, 2 from scarlet fever, 1 from whooping-cough, 4 from diphtheria, and 20 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 1 more, from scarlet fever and from diphtheria they number the same, while from whooping-cough they are 3 fewer, and from the diarrhoeas of childhood 8 fewer.

Deaths from respiratory diseases numbered 89. They are 8 more than in the previous week.

Deaths of children of less than one year old numbered 109, and those of persons of sixty-five and upwards 178. The former are 14 fewer than in the previous week, and 50 fewer than in the corresponding week of last year. The latter are 36 more than in the previous week, but 1 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 32. They are 11 more than in the previous week, but the same as in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 48°·9, being 2°·2 below that for the previous week, but 5°·9 above that for the corresponding week of last year. The mean rainfall was 0·12 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 44. Week ending SATURDAY, NOVEMBER 5, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 5th November 1921 the births of 1078 living children, the deaths of 616 persons, and 439 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 601. The equivalent annual birth-rate is 24·2 per thousand, and the death-rate, corrected, 13·5.

The birth-rate for the week is 1·2 below that for the previous week, 3·0 below the mean of the rates for the three preceding weeks, and 2·7 below that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, but 2·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·4 in Kirkcaldy, 21·4 in Coatbridge, and 20·4 in Ayr, to 7·8 in Clydebank, 9·4 in Falkirk, and 11·2 in Edinburgh. In Perth it was 17·3, in Hamilton 15·9, in Motherwell and Wishaw 14·4, in Dundee 14·3, in Aberdeen 14·1, in Glasgow 13·5, in Paisley 13·5, in Kilmarnock 13·1, and in Greenock 12·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 23. They are 5 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·5 per thousand. These deaths include 0 from enteric fever, 0 from measles, 4 from scarlet fever, 2 from whooping-cough, 3 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 2 more, and from whooping-cough 1 more, while those from diphtheria are 1 fewer, and from the diarrhoeas of childhood 6 fewer.

Deaths from respiratory diseases numbered 115. They are 26 more than in the previous week.

Deaths of children of less than one year old numbered 103, and those of persons of sixty-five and upwards 155. The former are 6 fewer than in the previous week, and 44 fewer than in the corresponding week of last year. The latter are 23 fewer than in the previous week, and 18 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 26. They are 6 fewer than in the previous week, and 12 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 45°·0, being 3°·9 below that for the previous week, but the same as that for the corresponding week of last year. The mean rainfall was 0·81 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 45. Week ending SATURDAY, NOVEMBER 12, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 12th November 1921 the births of 1110 living children, the deaths of 582 persons, and 296 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 573. The equivalent annual birth-rate is 24·9 per thousand, and the death-rate, corrected, 12·9.

The birth-rate for the week is 0·7 above that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, and 1·9 below that for the corresponding week of last year. The death-rate for the week is 0·6 below that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 2·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 25·1 in Perth, 19·3 in Greenock, and 15·8 in Dundee, to 9·5 in Coatbridge, 9·8 in Motherwell and Wishaw, and 10·2 in Kilmarnock and in Ayr. In Paisley it was 14·1, in Aberdeen 13·4, in Glasgow 12·6, in Edinburgh 11·7, in Clydebank 11·2, in Falkirk 11·0, in Hamilton 10·6, and in Kirkcaldy 10·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 1 from enteric fever, 1 from measles, 2 from scarlet fever, 2 from whooping-cough, 7 from diphtheria, and 13 from the diarrhœas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, from enteric fever 1 more, and from measles 1 more, but those from whooping-cough number the same, while from the diarrhœas of childhood they are 1 fewer, and from scarlet fever 2 fewer.

Deaths from respiratory diseases numbered 119. They are 4 more than in the previous week.

Deaths of children of less than one year old numbered 103, and those of persons of sixty-five and upwards 163. The former are the same as in the previous week, but 42 fewer than in the corresponding week of last year. The latter are 8 more than in the previous week, but 37 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 22. They are 4 fewer than in the previous week, but 2 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 37°·2, being 7°·8 below that for the previous week, and 12°·4 below that for the corresponding week of last year. The mean rainfall was 0·05 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 46. Week ending SATURDAY, NOVEMBER 19, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 19th November 1921 the births of 1167 living children, the deaths of 735 persons, and 283 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 705. The equivalent annual birth-rate is 26·2 per thousand, and the death-rate, corrected, 15·8.

The birth-rate for the week is 1·3 above that for the previous week, 1·4 above the mean of the rates for the three preceding weeks, and 0·3 above that for the corresponding week of last year. The death-rate for the week is 2·9 above that for the previous week, 2·6 above the mean of the rates for the three preceding weeks, and 1·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·7 in Aberdeen, 20·6 in Greenock, and 17·4 in Edinburgh, to 7·9 in Hamilton, 8·3 in Coatbridge, and 9·2 in Kirkcaldy. In Dundee it was 15·8, in Glasgow 15·7, in Perth 15·7, in Falkirk 15·6, in Paisley 15·4, in Motherwell and Wishaw 12·9, in Kilmarnock 11·7, in Ayr 11·7, and in Clydebank 10·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34. They are 8 more than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 3 from enteric fever, 0 from measles, 4 from scarlet fever, 4 from whooping-cough, 3 from diphtheria, and 20 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 7 more, from enteric fever, from scarlet fever, and from whooping-cough each 2 more, while from diphtheria they are 4 fewer.

Deaths from respiratory diseases numbered 156. They are 37 more than in the previous week.

Deaths of children of less than one year old numbered 109, and those of persons of sixty-five and upwards 230. The former are 6 more than in the previous week, but 36 fewer than in the corresponding week of last year. The latter are 67 more than in the previous week, and 79 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 29. They are 7 more than in the previous week, but the same as in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 42°·0, being 4°·8 above that for the previous week, but 4°·9 below that for the corresponding week of last year. The mean rainfall was 1·00 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 47. Week ending SATURDAY, NOVEMBER 26, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 26th November 1921 the births of 1120 living children, the deaths of 680 persons, and 303 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 658. The equivalent annual birth-rate is 25·1 per thousand, and the death-rate, corrected, 14·8.

The birth-rate for the week is 1·1 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 0·3 below that for the corresponding week of last year. The death-rate for the week is 1·0 below that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·4 in Kirkcaldy, 19·0 in Kilmarnock, and 17·2 in Falkirk, to 7·8 in Perth, 8·3 in Coatbridge, and 10·1 in Clydebank. In Edinburgh it was 16·9, in Motherwell and Wishaw 15·9, in Glasgow 14·8, in Aberdeen 14·8, in Dundee 13·6, in Paisley 13·5, in Greenock 12·2, in Hamilton 11·9, and in Ayr 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 39. They are 5 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 2 from enteric fever, 3 from measles, 4 from scarlet fever, 2 from whooping-cough, 6 from diphtheria, and 22 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 3 more, from diphtheria 3 more, and from the diarrhoeas of childhood 2 more, while those from scarlet fever number the same, but from enteric fever 1 fewer, and from whooping-cough 2 fewer.

Deaths from influenza numbered 7. They are 1 more than in the previous week, but the same as in the corresponding week of last year.

Deaths from respiratory diseases numbered 141. They are 15 fewer than in the previous week.

Deaths of children of less than one year old numbered 124, and those of persons of sixty-five and upwards 214. The former are 15 more than in the previous week, but 1 fewer than in the corresponding week of last year. The latter are 16 fewer than in the previous week, but 18 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 32. They are 3 more than in the previous week, and 1 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 41°·4, being 0°·6 below that for the previous week, but 0°·4 above that for the corresponding week of last year. The mean rainfall was 0·72 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 48. Week ending SATURDAY, DECEMBER 3, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 3rd December 1921 the births of 1132 living children, the deaths of 696 persons, and 388 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 689. The equivalent annual birth-rate is 25·4 per thousand, and the death-rate, corrected, 15·5.

The birth-rate for the week is 0·3 above that for the previous week, the same as the mean of the rates for the three preceding weeks, but 0·5 below that for the corresponding week of last year. The death-rate for the week is 0·7 above that for the previous week, 1·0 above the mean of the rates for the three preceding weeks, and 1·0 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·9 in Kilmarnock, 18·7 in Aberdeen, and 18·0 in Dundee, to 9·0 in Clydebank, 9·4 in Falkirk, and 10·7 in Coatbridge. In Glasgow it was 16·4, in Hamilton 15·9, in Kirkcaldy 15·8, in Perth 15·7, in Ayr 14·6, in Greenock 14·1, in Motherwell and Wishaw 13·6, in Paisley 13·5, and in Edinburgh 12·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 29. They are 10 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 0 from enteric fever, 2 from measles, 6 from scarlet fever, 6 from whooping-cough, 8 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, from scarlet fever 2 more, and from diphtheria 2 more, while those from measles are 1 fewer, and from the diarrhoeas of childhood 15 fewer.

Deaths from influenza numbered 11. They are 4 more than in the previous week, and 3 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 136. They are 5 fewer than in the previous week.

Deaths of children of less than one year old numbered 110, and those of persons of sixty-five and upwards 224. The former are 14 fewer than in the previous week, and 25 fewer than in the corresponding week of last year. The latter are 10 more than in the previous week, and 43 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 32. They are the same as in the previous week, but 5 more than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 40·8, being 0°·7 below that for the previous week, and 2°·9 below that for the corresponding week of last year. The mean rainfall was 0·19 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 49. Week ending SATURDAY, DECEMBER 10, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 10th December 1921 the births of 1131 living children, the deaths of 729 persons, and 354 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 699. The equivalent annual birth-rate is 25·4 per thousand, and the death-rate, corrected, 15·7.

The birth-rate for the week is the same as that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, but 0·6 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·8 in Perth, 17·5 in Edinburgh, and 16·7 in Aberdeen and in Greenock, to 7·1 in Coatbridge, 7·3 in Kilmarnock, and 9·8 in Motherwell and Wishaw. In Glasgow it was 16·4, in Dundee 16·1, in Hamilton 14·6, in Clydebank 13·5, in Kirkealdy 13·2, in Paisley 12·9, in Falkirk 11·0, and in Ayr 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26. They are 3 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 0 from enteric fever, 4 from measles, 3 from scarlet fever, 2 from whooping-cough, 9 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 2 more, from diphtheria 1 more, and from the diarrhoeas of childhood 1 more, while those from scarlet fever are 3 fewer, and from whooping-cough 4 fewer.

Deaths from influenza numbered 7. They are 4 fewer than in the previous week, but 2 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 143. They are 7 more than in the previous week.

Deaths of children of less than one year old numbered 120, and those of persons of sixty-five and upwards 226. The former are 10 more than in the previous week, but 36 fewer than in the corresponding week of last year. The latter are 2 more than in the previous week, and 52 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 26. They are 6 fewer than in the previous week, and 9 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 46°·1, being 5°·3 above that for the previous week, and 9°·5 above that for the corresponding week of last year. The mean rainfall was 0·81 inch.

* Cerebro-spinal meningitis.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 50. Week ending SATURDAY, DECEMBER 17, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 17th December 1921 the births of 1164 living children, the deaths of 662 persons, and 277 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 629. The equivalent annual birth-rate is 26·1 per thousand, and the death-rate, corrected, 14·1.

The birth-rate for the week is 0·7 above that for the previous week, 0·8 above the mean of the rates for the three preceding weeks, but 2·2 below that for the corresponding week of last year. The death-rate for the week is 1·6 below that for the previous week, 1·2 below the mean of the rates for the three preceding weeks, and 2·0 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·8 in Hamilton, 17·4 in Aberdeen, and 17·3 in Perth, to 4·5 in Clydebank, 6·3 in Falkirk, and 11·4 in Motherwell and Wishaw. In Paisley it was 16·6, in Greenock 16·1, in Dundee 15·8, in Kirkcaldy 15·8, in Glasgow 14·6, in Kilmarnock 14·6, in Ayr 13·1, in Coatbridge 11·9, and in Edinburgh 11·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34. They are 8 more than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 1 from enteric fever, 12 from measles, 2 from scarlet fever, 4 from whooping-cough, 4 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 8 more, from the diarrhoeas of childhood 3 more, from whooping-cough 2 more, and from enteric fever 1 more, but those from scarlet fever are 1 fewer, and from diphtheria 5 fewer.

Deaths from influenza numbered 8. They are 1 more than in the previous week, and 5 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 136. They are 7 fewer than in the previous week.

Deaths of children of less than one year old numbered 107, and those of persons of sixty-five and upwards 209. The former are 13 fewer than in the previous week, and 54 fewer than in the corresponding week of last year. The latter are 17 fewer than in the previous week, but 9 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are 2 fewer than in the previous week, and 8 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 44°·4, being 1°·7 below that for the previous week, but 9°·5 above that for the corresponding week of last year. The mean rainfall was 0·35 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 51. Week ending SATURDAY, DECEMBER 24, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 24th December 1921 the births of 1171 living children, the deaths of 663 persons, and 380 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 636. The equivalent annual birth-rate is 26·3 per thousand, and the death-rate, corrected, 14·3.

The birth-rate for the week is 0·2 above that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, and 1·5 above that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, but is 0·8 below the mean of the rates for the three preceding weeks, and 3·0 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 25·1 in Perth, 16·0 in Kilmarnock, and 15·8 in Kirkcaldy, to 4·4 in Ayr, 7·9 in Hamilton, and 9·0 in Clydebank. In Falkirk it was 15·6, in Aberdeen, 15·1, in Motherwell and Wishaw 15·1, in Dundee 14·9, in Glasgow 14·8, in Paisley 14·1, in Edinburgh 14·0, in Greenock 11·6, and in Coatbridge 9·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 48. They are 14 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 1 from enteric fever, 25 from measles, 3 from scarlet fever, 6 from whooping-cough, 7 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 13 more, from diphtheria 3 more, from whooping-cough 2 more, and from scarlet fever 1 more, but those from the diarrhoeas of childhood are 5 fewer.

Deaths from influenza numbered 8. They are the same as in the previous week, and as in the corresponding week of last year.

Deaths from respiratory diseases numbered 121. They are 15 fewer than in the previous week.

Deaths of children of less than one year old numbered 117, and those of persons of sixty-five and upwards 185. The former are 10 more than in the previous week, but 25 fewer than in the corresponding week of last year. The latter are 24 fewer than in the previous week, and 41 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 24. They are the same as in the previous week, but 2 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 42°·0, being 2°·4 below that for the previous week, but 2°·7 above that for the corresponding week of last year. The mean rainfall was 1·50 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN FIFTEEN PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 52. Week ending SATURDAY, DECEMBER 31, 1921. Price 2d. net.

In the Fifteen Principal Towns of Scotland, which collectively have a population of 2,323,814, there were registered during the week ending 31st December 1921 the births of 1200 living children, the deaths of 705 persons, and 808 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 682. The equivalent annual birth-rate is 26·9 per thousand, and the death-rate, corrected, 15·3.

The birth-rate for the week is 0·6 above that for the previous week, 1·0 above the mean of the rates for the three preceding weeks, but is the same as that for the corresponding week of last year. The death-rate for the week is 1·0 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, but 4·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·0 in Kilmarnock, 18·2 in Glasgow, and 17·8 in Paisley, to 9·4 in Perth and in Falkirk, and 10·1 in Clydebank. In Hamilton it was 15·9, in Coatbridge 14·3, in Dundee 13·6, in Edinburgh 13·0, in Aberdeen, 12·5, in Kirkcaldy 11·9, in Motherwell and Wishaw 11·4, in Greenock 10·3, and in Ayr 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 68. They are 20 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 0 from enteric fever, 35 from measles, 4 from scarlet fever, 8 from whooping-cough, 8 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 10 more, from the diarrhoeas of childhood 7 more, from whooping-cough 2 more, from scarlet fever 1 more, and from diphtheria 1 more.

Deaths from influenza numbered 13. They are 5 more than in the previous week, and 4 more than in the corresponding week of last year.

Deaths from respiratory diseases numbered 123. They are 2 more than in the previous week.

Deaths of children of less than one year old numbered 129, and those of persons of sixty-five and upwards 194. The former are 12 more than in the previous week, but 48 fewer than in the corresponding week of last year. The latter are 9 more than in the previous week, but 69 fewer than in the corresponding week of last year.

Deaths attributed to violent causes numbered 28. They are 4 more than in the previous week, but 7 fewer than in the corresponding week of last year.

The mean temperature for the first seven towns named in the Table was 41°·2, being 0°·8 below that for the previous week, and 2°·2 below that for the corresponding week of last year. The mean rainfall was 1·99 inch.

Note :— Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

+ 2 Small-pox, 1 Typhus and 2 Cerebro-spinal meningitis.
* 2 Cerebro-spinal meningitis, and 1 Typhus.
† Cerebro-spinal meningitis.
